

Riser & Nozzle Kits

Each Riser Kit includes 10 45° nozzles, 10 24" copper risers, 12 union tees, 2 plugs, 150' of tubing and a tube cutter.

Each Nozzle Kit includes 10 45° nozzles, 12 union tees, 2 plugs, 100 clamps w/screws, 150' of tubing and a tube cutter.

Pynamite's exclusive nozzles are the only nozzles on the market with cleanable mesh filters. Simply remove the filter and rinse or soak to remove sediment found in hard water that will clog nozzles over time. Never purchase replacement filters!

Cube Pro system can mist up to 60 nozzles on up to 900 feet of tubing. Mix and match the kits for greater flexibility. Risers placed 8-10 feet apart can be permanently set up in flower beds and other landscaping. Place nozzles 10 feet apart on the eaves of a structure, in trees, landscaping and along fence lines to make a mosquito free barrier.

OPTION

- **MIX & MATCH**
Mix and Match kits to get the exact coverage needed

FEATURES

- Stainless steel nozzles are engineered especially for Pynamite Mosquito Misting systems.
- Nozzle orifice size and shape ensures the exact droplet size required to get the most benefit from the insecticide being misted.
- 150' of 1/4" nylon tubing allows for any installation configuration.
- Extra tees and plugs offer greater flexibility.
